Comments on pending legislation.

Office of General Counsel

The purpose of this bill is to provide for reimbursement to the "Employees' Compensation Fund" of expenditures made on behalf of each agency under the authority of the Federal Employees' Compensation Act. Quarterly the Secretary of the Treasury will determine the amount that has been expended in behalf of each agency and will forward a bill to the agency concerned. After an opportunity to correct any errors in the bill, the agency must reimburse the Fund in the amount named. There seems nothing here of special concern to this Agency.
